central banks are expected to provide support to both the economy and the equity market. In the Nordics it is predicted that consumers' finances will improve during the year with higher real incomes, declining inflation and lower interest rates. Company profit outlooks also appear more positive. With optimism about a soft landing for the global economy and the peak in interest rates now behind us, the equity market has shown a strong rebound and the future looks promising.

During the quarter the fund increased its investments in AAK and decreased in SCA. Companies that contributed to fund returns included AAK, Crayon and Zealand Pharma, while the holdings in Chemometec, New Wave and Nibe had a negative impact on returns.
