

Handelsbanken EMEA Tema (A9 EUR)

The fund is actively managed and invests in equities issued by companies in the EMEA region (Eastern Europe, including the former Soviet republics and Greece, the Middle East and Africa). As a result, the fund has a currency exposure to these markets. The thematic investment strategy provides for investments that occur in a limited area in which development is deemed to result in a structural change to the economy and society. This change provides favorable conditions for companies active within the area to create profitable growth over time. The fund is reported as an Article 8 fund pursuant to EU regulation 2019/2088 on sustainability-related disclosures in the financial services sector (SFDR).

As of: 30.04.2024

Fund performance was positive during the quarter and the fund rose 4.5% in SEK. Turkey, Slovenia and Kazakhstan were the strongest markets in EMEA, rising over 20% during the quarter. Nigeria and Egypt were the weakest markets, where the stock market rose in local currency but fell in SEK by approximately -20% due to devaluations.

The Education theme was the strongest contributor to fund returns with South African Advtech. The Improved Healthcare theme also posted strength with Polish Benefit

Systems, which increased its customer base significantly at their gyms and healthcare centers in the past year. The holding in Alkhorayef Water within the Improved Environment theme, which builds and maintains facilities for drinking water and the purification of wastewater, rose sharply when they won several large orders.

On the negative side were companies with exposure to earnings in parts of Africa that had major devaluations, such as the mobile operators MTN and Airtel Africa, as well as banks such as CIB in Egypt and GTC in Nigeria. The market in South Africa is being cautious before the election at the end of May, while Turkey held a municipal election that was a success for the opposition and was received positively by the stock market.

We are expecting a more positive stock market in these markets once the elections have concluded. The countries in Africa that had devaluations can also obtain an improved functioning of the economy with more reasonable currency prices, which is positive.
