

Handelsbanken Pension 60 Aktiv

The fund is most appropriate for investors born in the 1960s. The fund invests in Nordic and global equity funds, as well as Swedish fixed income funds. The objective of the fund is to achieve good returns, while gradually reducing risk up to the time of retirement. We decrease the proportion of equities and gradually increase the proportion of interest-bearing securities until the retirement age. The fund invests primarily in funds within Handelsbanken as well as in fund that are managed by other fund management companies. Refer to Portfolio distribution at www.handelsbanken.se/funds for the current distribution. The fund is reported as an Article 8 fund pursuant to EU regulation 2019/2088 on sustainability-related disclosures in the financial services sector (SFDR).

The month of June was positive for the global equity markets and the World Index rose just 3% in SEK. A weaker SEK benefited the returns on foreign holdings. The US equity markets posted the strongest performance, driven by the major US technology companies. Emerging markets also posted strength in the period. In contrast, the stock markets in Sweden and Europe

lagged. The Swedish market rates fell in June, which led bond funds to outperform fixed income funds with shorter duration. The market continued to focus on inflation data and the actions of the central banks. As expected, the European Central Bank cut interest rates at the beginning of June. The upcoming elections in France, UK and US have periodically affected the financial markets.

We increased the fund's holdings in Handelsbanken Global Digital and Handelsbanken Hålsövärd Tema. We also added a new global equity fund, JPMorgan Global Research Enhanced Index Fund, whose strategy is based on Handelsbanken's sustainability framework. We decreased the exposure to US small caps and made a corresponding increase in European small caps where we currently see greater potential.

We are maintaining our positive outlook on risk assets and expect the inflation rate to continue to decline and that economic growth will gain momentum. In this climate we also expect to see higher corporate earnings. As a result, we believe there are good conditions for a further rise in the equity markets and therefore remain overweight in equities relative to fixed income investments. We see the strongest potential in high-quality companies, small caps, digitalization, healthcare and real estate. Within the fixed income holdings we prefer corporate bonds as we believe these offer attractive yields. Historical yields are not a guarantee of future returns. A fund can both increase and decrease in value and it is not guaranteed that you will recover the entire invested amount. Note that a fund with risk level 5-7, as stated in the fund's fact sheet (KID), can vary greatly in value due to the fund's composition and management methodology. The prospectus, fund rules and KID are available under each fund. [Summary of investors' rights.](#)
