

# Handelsbanken Japan Tema (A10 EUR)

The fund is actively managed and invests in equities issued by companies in Japan and thereby has a currency exposure to this market. The thematic investment strategy provides for investments that occur in a limited area in which development is deemed to result in a structural change to the economy and society. This change provides favorable conditions for companies active within the area to create profitable growth over time. For this fund, the fund company's Enhanced exclusion level applies. For information about sectors that the fund excludes, see the Detailed information tab. The fund is reported as an Article 8 fund pursuant to EU regulation 2019/2088 on sustainability-related disclosures in the financial services sector (SFDR).

## Five years performance

## Portfolio

## Portfolio manager comments — Q2 2025

Fund performance was positive during the second quarter, rising by nearly 8% in SEK.

The Japanese equity market plunged in early April following President Trump's announcement of new tariffs, briefly falling below the August 2024 low. However, it quickly rebounded as US equities, bonds and the dollar weakened.

In May and June, optimism spread as the anticipated impact of the tariffs appeared less severe than initially feared, helping the Nikkei regain its pre-"Liberation Day" levels.

The market experienced a shift during the quarter, with small-cap and mid-cap

Nintendo Co Ltd	3.01%

companies leading the rally early on, while larger and export-oriented companies performed better toward the end.

During the May earnings season, companies generally issued cautious guidance for fiscal year 2026. Many cited tariff uncertainty and a stronger yen, driven by a weakening dollar. At the same time, share buyback levels were higher than during the same period last year. There was also an increase in announced MBOs and delistings of dual-listed parent and subsidiary companies. Activist investors had greater success at this year's AGMs, with more shareholder proposals being approved than in previous years.

Despite the market recovery, trade negotiations between Japan and the US remain unresolved, and some fundamental conditions are still lacking. Against this backdrop, the fund increased its exposure to sectors with strong domestic demand, such as IT services, construction, and IP and gaming-related companies—areas considered less sensitive to trade restrictions. At the same time, the fund reduced its holdings in larger companies with higher exposure to international trade.

NTT Data, the fund's most overweight holding, was acquired by its parent company NTT during the quarter. The deal, which offered shareholders a premium of around 40%, made NTT Data the single largest contributor to the fund's outperformance during the period.

Large-cap and semiconductor equities rebounded strongly in the later part of the quarter, further supporting performance.

As of: 09.07.2025
