

Portfolio Manager: LISA SYNNING

Up to 10/06/2025 Asset Allocation Team | Head: PÅR SJÖGEMARK

The fund is a securities fund according to the Swedish Investment Funds Act (2004:46).

BASE CURRENCY

# Handelsbanken Fokus 75

## Investment Focus

The fund is actively managed, which means that the portfolio manager takes active, independent investment decisions. The long term objective of the fund is to exceed the returns of the underlying market, defined as the benchmark index. The fund invests primarily in fixed income funds and in Nordic and global equities. Investments in fixed income funds are mainly made exclusively in Handelsbanken's funds. Fund returns are determined by how the fund's investments in equities, equity funds, fixed income funds and alternative investments increase or decrease in value. The equity portion in the fund can fluctuate between 65-85%. The fixed income portion can fluctuate between 15-35%. The asset management is adjusted within each interval based on the assessment of the fund manager. International norms and guidelines for the environment, social responsibility and corporate governance are taken into consideration and the fund applies an exclusion strategy for companies (both direct holdings as well as holdings in funds in which the fund invests) operating within the alcohol, tobacco, cannabis, commercial gambling, weapons and military equipment, pornography and fossil fuels segments/sectors. However, the fund may invest in companies that are considered to be in transition towards fossil-free energy production. This is applicable to both direct holdings as well as holdings in funds in which the fund invests. With regard to the fund's investments in index derivatives, the fund will primarily invest in sustainability-oriented instruments. In the absence of such instruments, the fund will invest in index derivatives and index products that may include companies that are not permitted in accordance with the aforementioned exclusion criteria. The fund can invest in derivative instruments as part of the fund's investment focus, which can result in leveraging. We compare the fund's performance with Solactive ISS ESG Screened Global Markets Index (45%), HMNI Swe All Government Dur Const 6Y (8,75%), HMNI Swe All Mortgage Dur Const 2.5Y (3,75%), SIX SRI Nordic 200 Net Index (30%), OMRX Treasury Bill (12,5%). As the fund is actively managed the performance will over time deviate from this index.

## Portfolio

The fund fell by -1.9% during H1 2025\*. The benchmark index fell by -0.8% over the same period.

The fund underperformed its benchmark index after accounting for management fees, which was primarily due to the fund's overweight in equities during a period that was marked by significant fluctuations in the stock market. The market's focus was on tariffs and the potential impact of the trade war on profits and the global economy. The US stock market rebounded sharply in the second half of H1 2025 when the initially high tariff levels were lowered significantly or postponed and the results of the reporting period were unexpectedly positive.

The stock markets in Europe posted the most strength and in particular our exposure to European small caps, while the performance in the US stock markets was weaker due to foreign currency effects. The exposure to healthcare equities also lagged due to concerns about the effects of the trade tariffs on the sector. We increased our exposure to small caps in the US and the Nordics within the equity holdings. At the sector level we increased the exposure to US technology companies and decreased in healthcare companies. The Swedish market rates declined, resulting in bonds outperforming fixed income funds with a shorter duration in the holdings. The performance of our exposure to fixed income funds within the High Yield segment was favorable, while emerging market bonds lost value due to foreign currency effects. We increased our exposure to credits further during the period and shortened the duration in our fixed income holdings. The alternative holdings were driven primarily by the strong performance in the hedge fund, AQR Adaptive Equity Market Neutral Fund. The fund amended its fund rules in June, changed its name to Fokus and also switched its fund manager. The fund is an actively-managed fund that invests primarily in fixed income funds as well as in Nordic and global equities. 0%-35% of the fund's value will be invested in equities, equity

funds or other equity-related financial instruments, and 65%-85% will be invested in fixed income funds or other interest-related financial instruments. Investments in fixed income funds are made almost exclusively in Handelsbanken's funds. The fund also increased the proportion of holdings in global equities during H1 2025 and decreased the Nordic equity holdings by a corresponding amount. The benchmark index was adjusted in conjunction with this change.

\* The fund may have additional share classes, the concerned share class is stated in the Fund facts. Refer to fund statistics for comparable index  
\*\* Solactive ISS ESG Screened Global Markets Index NTR, performance is shown in the fund's base currency.

## Significant risks

The fund is a mixed fund where the risk is due to the allocation between the equity, fixed income securities and alternative investment asset classes. A larger proportion of equities or alternative investments results in a higher risk but also the potential for a higher return. Investments in interest-bearing securities or in fixed income funds are associated with interest rate risk, which means that fund returns are affected by interest rate changes. A fund that invests in fixed income securities with a long residual fixed interest duration has a higher interest rate risk than a fund that invests in fixed income instruments with a shorter residual fixed interest duration. The average residual fixed interest duration for holdings in the fund can vary significantly over time. The fund has the option of investing with an emphasis on regions and sectors. This means that the risk in the fund can be higher than an investment in a diversified global fund that allocates its investments across several regions and sectors. The fund has a currency risk, which means that the returns and the risk are affected by changes in exchange rates. An investment in an fixed income instrument results in a credit risk, as the fund can be affected by a loss due to an issuer not fulfilling its commitments. The credit risk is higher when the fund's proportion of assets in fixed income securities issued by companies or states with a low credit quality is high.

The fund may invest in derivatives as part of its investment focus to increase returns in the fund and to create leverage. Investments in derivatives can increase the fund's sensitivity to market fluctuations.

A sustainability risk is an environmental-, social-, or corporate governance-related event or condition that, should it occur, could cause an actual or potential significant adverse impact on a company's value. Accordingly, environmental-related, as well as social-, or governance-related events can arise from a company's own business operations or from events that occur independently of the company. The sustainability risks in the fund are systematically measured and followed up.

## Trading with derivatives

According to the fund rules, the fund may trade with derivatives as part of its investment focus. The fund did use this option during the first half of 2025. The fund has the option of lending securities. The fund did not use this option during the first half of 2025. The fund may use other techniques and instruments. The fund did not use this option during the first half of 2025.

- Highest leverage during the financial year 24.3%
- Lowest leverage during the financial year 13.0%
- Average leverage during the financial year 18.0%

## Information

June 11, 2025, the fund changed its fund rules. In conjunction with the change, the name of the fund changes from Handelsbanken Multi Asset 60 to Handelsbanken Fokus 75. At the same time, the equity exposure was changed in line with the new fund regulations. A sub-component of the fund's benchmark index was removed, which referred to the benchmark index's Nordic equity exposure, and a sub-component was

changed, which rejects the global equity exposure.

June 1, 2025, the weight of three sub-components of the fund's benchmark index regarding equity exposure was changed.

### Shareholder commitments

Based on the Management Company's Policy for shareholder engagement and responsible investment and the Management Company's Voting policy, the Management Company carries out voting at shareholders' meetings, nomination committee work and dialogues held in-house with the portfolio companies or in collaboration with others. The Management Company's work in nomination committees is also regulated by the Guidelines for nomination committee work. It is our view that this work will improve governance and reduce sustainability risks in the portfolio companies, which in turn will result in positive value growth.

The Management Company ensures that relevant information is available as a basis for analysis and voting decisions. This information is provided through analyses from proxy advisors, as well as through market information, third-party analyses or contact with the company. The Management Company then makes independent decisions on those issues where voting or other decisions are to be taken.

The Management Company primarily votes at the general meetings where the funds own a minimum of 0.5% of the votes, where the companies constitute significant holdings in each fund, where the Management Company determines that a specific engagement effort is necessary in accordance with the Management Company's established sustainability objectives and commitments, at companies with which the Management Company holds dialogues in which the subject of the dialogue will be presented for a decision at the general meeting, companies affected by such initiatives and or collaborations that the Management Company has joined and which the Fund Company deems to be prioritized, as well as at other general meetings that address principal or controversial issues. The objective for impact funds is that the Management Company votes in all the companies in which these funds invest. The Management Company determines which equities will be lent. For example, equity lending does

not occur in companies in which the Management Company has a seat on the nomination committee. In each individual case, the Management Company makes an assessment of whether or not an equity loan will be withdrawn. Securities lending revenues for the fund are weighed against opportunities for shareholder engagement at the general meeting.

Handelsbanken Fonder participates in all nomination committees where we have a sufficiently large ownership to be offered a seat. However, nomination committees are not common outside of the Nordics and the board composition can only be impacted by voting at the shareholders' meetings.

Within its shareholder engagement, Handelsbanken Fonder conducts engagement dialogues with companies to encourage the company to enhance its sustainability work as well as with companies that we believe are not compliant with the international norms and conventions respected by the Management Company.

Engagement work is conducted primarily through direct dialogues between Handelsbanken Fonder and the companies, joint dialogues together with other investors, as well as in collaborations and initiatives with focus on specific sustainability issues.

There have been no conflicts of interest between the Management Company and the portfolio companies in conjunction with the fund's investments. Information about how the Management Company in general addresses conflicts of interest that may arise in conjunction with the fund's investments is available in the Management Company's Policy for shareholder engagement and responsible investment.

Read more about Handelsbanken Fonder's approach to ownership issues and about the Management Company's guidelines for responsible investment in the Company's Policy for shareholder engagement and responsible investment, the Management Company's Voting policy and the Guidelines for nomination committee work, which are available at [www.handelsbankenfonder.se](http://www.handelsbankenfonder.se), under Follow our work/Policies, guidelines and other information.

PÄR SJÖGEMARK

Head of Sustainability

AURORA SAMUELSSON

Post address: SE-106 70 STOCKHOLM

Telephone: +46-8-701 10 00

# Information from Handelsbanken Fonder AB

## Corporate Governance

Handelsbanken Fonder (the Management Company) exercises an active ownership role. The purpose is to participate so that the Company takes decisions that lead to a sustainable and positive value growth, which in turn benefit our unit holders. We view our ownership role from a long-term perspective, given that changes in companies often take time to implement. As a guideline for our actions, the Board of Directors of the Management Company has adopted a Policy for shareholder engagement and responsible investments. Our work is also guided by those principles established in the Swedish Corporate Governance Code. The Management Company's work in nomination committees is also regulated by the Guidelines for nomination committees.

An essential channel is the regular contacts that our portfolio managers have with those companies in which we invest or intend to invest. This provides a very good opportunity to present our views on the performance demonstrated by the companies. We emphasize good corporate governance, sustainability and transparency at the companies in which we invest.

The Management Company participates in a number of nomination committees where we have a sufficiently large ownership to be able to influence the recommendations to the composition of the board of directors. The board shall have extensive and relevant competence and its composition shall be characterized by different perspectives. We work actively for a more equal distribution of genders in the boards.

The management Company's ambition is to vote at the annual general meetings where we have significant ownership and where our votes could have a material impact, which is normally over approximately 0.5 per cent of the votes. We participate in a substantial number of annual meetings each year, in the Nordics, but also in other countries where we have a substantial ownership. In some cases, companies request a dialogue with shareholders prior to a proposal being presented at the annual meeting to gain support for the proposal by the major shareholders. The Management Company participates in such discussions to the extent we have been invited and presents our views that aim at achieving a favourable result for unit holders.

The Management Company's Policy for shareholder engagement and responsible investments is available on our website at: <https://www.handelsbanken.se/sv/om-oss/svenska-dotterbolag/handelsbanken-fonder/our-work>.

## Responsible Investments

The Management Company's view is that responsible conduct is a fundamental prerequisite for long-term value creation in a company. Responsible investment is therefore a key condition for achieving our goal of delivering strong long-term returns.

The Management Company's main objective is to generate financial returns through fund management that supports the goals of the Paris Agreement and, while also contributing – within the scope of the Management Company's operations – as much as possible to the UN's 17 Sustainable Development Goals (SDGs) as defined in the 2030 Agenda. As a significant investor, the Management Company has an important role to play in, for example, the realisation of the Paris Agreement, driving capital towards investments that support the achievement of the SDGs, and the transition to sustainable development. This is reflected in our efforts towards:

- Net-zero greenhouse gas emissions from our overall investment portfolio by 2040
- Increasing investments that contribute to the 2030 Agenda

The Management Company has signed the UN Principles for Responsible Investment (UN PRI) through the bank, and both Handelsbanken and the Management Company support the voluntary UN Global Compact initiative. The Management Company has also signed the Net Zero Asset Managers Initiative. These

initiatives and guidelines, together with the Management Company's Policy for Shareholder Engagement and Responsible Investment, guide the Management Company's sustainability efforts. The policy describes, among other things, the sustainability practices applied in our fund management, exclusion, inclusion and engagement, as well as principles for our corporate governance. Read more about this under each fund's report and in the Management Company's Policy for Shareholder Engagement and Responsible Investments, available at [handelsbankenfonder.se](https://handelsbankenfonder.se).

## Accounting and valuation principles

The Semi-Annual Report is drawn up in accordance with generally accepted accounting principles. The accounting principles for the securities funds are based on the Swedish Investment Funds Act (2004:46) and on the Alternative Investment Fund Managers Act (2013:561) for our non-UCITS funds, ESMA's guidelines. The principles are also based on the Swedish Investment Fund Association's Guidelines for Key Ratio Accounting of Swedish UCITS and non-UCITS funds as well the Financial Supervisory Authority's regulations regarding Swedish UCITS funds (FFFS 2013:9) and the Financial Supervisory Authority's regulations regarding alternative investment fund managers (FFFS 2013:10) for our non-UCITS funds. Further, applicable provisions in the Swedish Accounting Act are also applied. Accounting is based on the transaction date.

### Valuation principles

Financial instruments, assets and liabilities are valued at market value.

Equities and equity-related instruments are valued primarily at the official closing price, thereafter at the latest trading price from the same day as the time of the valuation.

Interest-bearing securities are valued primarily at the bid price. Swedish government bonds and covered bonds are valued primarily at the median mid-yield.

Interest rate and currency derivatives that are not exchange-traded are valued in accordance with generally-accepted valuation models.

In the event a reliable price is unavailable, alternatively the instrument is not regularly traded, a valuation model can be utilized. This also applies when an instrument that is normally valued through the use of a market price is no longer deemed to have a reliable price.

Financial instruments, assets and liabilities that are revalued to the fund's portfolio currency are recalculated based on the official closing exchange rate on the balance sheet date.

## More information

You will find the complete information brochure with fund rules, fact sheets and current share price performance on our website at [www.handelsbanken.se/funds](http://www.handelsbanken.se/funds). For further information on the subscription and redemption of fund units, please contact your local Handelsbanken branch office.

# Definitions

## Fund statistics

**Average fund capital** – Calculated as the mean value of the fund's net asset value during the year (or that portion of the year during which the fund existed). The fund's net asset value is calculated on a daily basis.

**Average yearly return, 2, 5 and 10 years, respectively** – The fund's average effective annual yield during the last 2, 5 or 10 years, respectively.

**Collected management costs in % of average fund capital** – Actual management fees collected. Expenses are calculated daily and represent costs for management, administration, marketing and distribution. Expressed in percent of the average fund capital and calculated on a rolling 12-month basis.

**Costs for monthly savings SEK 100** – Total costs charged to a unit holder who had SEK 100 invested on the first banking day of each month during the year and retained the investment throughout the year. Calculated for the full year only and for funds and share classes that have existed during the full year. The corresponding amount for funds with EUR as the base currency is EUR 10. The corresponding amount for funds with NOK as the base currency is NOK 100.

**Costs for one-time subscription SEK 10 000** – Total costs charged to a unit holder who had SEK 10 000 invested in the fund at the beginning of the year and retained the investment throughout the year. Calculated for the full year only and for funds and share classes that have existed during the full year. The corresponding amount for funds with EUR as the base currency is EUR 1 000. The corresponding amount for funds with NOK as the base currency is NOK 10 000.

**Dividends per unit** – The Management Company determines the amount of the dividend to be paid to fund unit holders of the distribution share class on an annual basis. Distributions are paid to those fund unit holders registered for distribution shares on the distribution date determined by the Management Company.

**Duration** – The duration of a fund is a measure of how sensitive the fund is to changes in interest rates. Simply stated, it is the weighted average of the residual maturity in the fund's investments. Measured in years or months.

**Fund capital** – The fund's net asset value on the closing date for the respective year.

**Fund's total net flow** – Subscriptions less redemptions in the fund, excluding reinvested dividends and any flows from mergers.

**Index** – The index used by the fund as its benchmark.

**Index incl. dividends** – Performance of the fund's benchmark during the respective year. Performance is expressed in percent and is converted to the currency for each share class in those cases where the index is published in another currency. The table shows the index including dividends.

**Management fees and other administrative or operating costs** – The cost measurement includes management fee and refer to the ongoing costs in the fund, excluding transaction costs for securities, interest expenses, transaction-related tax expenses and any performance-based fees.

When the fund engages in security lending, 80% of the revenue earnings derived from the lending agreement is allocated to the fund whilst the remaining 20% is allocated to the securities lending agent. Given that the revenue allocation agreement increases the fund's costs, the remuneration paid to the securities lending agent will be included in the management fees and other administrative or operating costs.

The measure is based on the fees deducted from the fund during the period. It is expressed as a percentage of the average fund capital and calculated on a rolling 12-month basis.

A supplement for the underlying fund's most recently available management fees and other administrative or operating costs, after deducting for discounts received, will be added for funds that invest in other funds.

**Net asset value** – Net asset value expressed as the rate prevailing on the balance sheet date for the respective year.

**Number of units** – The number of outstanding units on the last banking day for the respective year. Reported in thousandths of units.

**Other assets in the balance sheet** contain receivables for unsettled trades, received after balance sheet date. This applies to both sold securities and issued fund shares.

**Other costs in the income statement** include transaction costs, taxes and bank costs.

**Other financial costs** in the income statement include expenses for security lending.

**Other financial income in the income statement** includes premiums for security lending and discounts for management costs in underlying funds.

**Other income in the income statement** refers to money paid back for bank charges and taxes.

**Other liabilities in the balance sheet** contain liabilities for unsettled trades, paid after balance sheet date. This applies to both purchased securities and redemption of fund shares.

**Other techniques and instruments** – Techniques and instruments used to improve the effectiveness of fund management refers to the following: techniques and instruments are attributable to transferable securities and money market instruments used in a cost-effective manner to lower risks and expenses or to increase returns in the fund with a risk level that is consistent with the fund's risk profile and applicable rules for the distribution of risk. Example of techniques and instruments include securities lending and agreements on the repurchase of securities sold, i.e., repos and reverse repo transactions.

**Risk** – The calculation of the fund's risk is the same for all EU member states. 1 is for the lowest risk (small price fluctuations) and 7 is for the highest risk (risk for substantial price fluctuations). The classification is based on the standard deviation (volatility) for the fund, calculated using the unit values over a five-year period. If five years of performance is not available, the standard deviation for the relevant comparable index or other benchmark will be used. Risk describes primarily market risk and currency risk.

**Share classes** – A fund can have several share classes. Different share classes have different conditions, e.g., currency, with dividends or without, management fee or an initial minimum subscription amount. Fund capital is the same for the share classes and therefore information refers to the fund as a whole unless stated otherwise. Fund units within each individual share class are the same size and have the same rights to the assets included in the fund. The distribution in a distribution share class impacts the relationship between the value of units that are non-distribution and the value of the units that are distribution, with the value of the distribution fund units decreasing in relation to the size of the distribution.

**Share of turnover conducted via closely related securities companies** – The proportion of fund purchases and sales of financial instruments conducted by Handelsbanken in terms of value. Expressed in percent of the fund's total turnover.

**Share of turnover conducted between funds managed by the same fund management company** – The proportion of fund purchases and sales of financial instruments conducted on behalf of the securities fund from another fund managed by the same fund management company. Expressed in

percent of the fund's total turnover.

**Total returns** – Reports how the value of a unit has changed during the respective year. If the fund has paid dividends during the year the change in value has been calculated as though the dividend or contribution before tax was added back on the distribution date. Annual return is measured in percent from the date of the previous year's closing date to the closing date for the respective year. Returns for the semi-annual review are reported for the first half of the current year.

**Transaction costs** – Expressed partly as an amount and partly as a percentage of the value of the financial instruments turned over. The value refers to the overall market value, but for futures and future related instruments the value refers to the exposure value. Calculated on a rolling 12-month basis. Reported in the Income Statement under the heading "Other expenses". Examples of transaction costs are courtage and derivative costs.

**Turnover rates (general principle)** – The fund's turnover rate calculated, on the one hand, as the ratio between the lowest total amount for securities purchased or sold during the year and, on the other hand, as the average fund capital during the same period. With regard to equity funds, fixed income securities with a residual maturity of a maximum of 397 days at the time of acquisition are excluded from purchased or sold securities. The turnover rate is reported as the number of times turned over per year and is calculated on a rolling 12-month basis.

**Turnover rate (leveraged funds)** – If a fund has traded with derivative instruments during the period and the turnover calculation conducted in accordance with the general principle makes the turnover information appear misleading, the fund's turnover rate is also calculated by decreasing the total of purchased and sold financial instruments during the period by the total of the subscribed and redeemed units in the fund. This amount is divided by the fund's average fund capital during the period.

**Volume of lent securities as a % of total lendable assets** – Is the market value of lent securities as of the balance sheet date divided by the market value of the fund's financial instruments with positive market value.

## Key figures for risk follow-up

*In order to obtain relevant comparisons, dividends have been reinvested in the funds and their respective benchmarks. All key figures have also been calculated on the basis of the Annual effective yields. The values for the past two years have been used for the majority of the funds. A risk forecast has been made for more recent funds, with fund holdings as of balance sheet date as the basis. In these cases, historical data for relevant reference portfolios is used for the calculation of the risk forecast.*

**Active return** states the annual over- or under effective return attained by the fund in comparison to its benchmark.

**Active Share** compares the equity fund's holdings with the holdings in its benchmark. The key figures are stated in percent, from 0% (exact same distribution as the index) to 100% (none of the holdings are included in the index). The measurement is calculated as one-half of the sum of the absolute deviations between a securities' weighting in the fund and its weight in the index.

**Information ratio** is a measure of the active returns attained by the fund when deviating from its benchmark. It is the ratio between the active returns and the tracking error. A negative information ratio means that the

fund has underperformed its benchmark.

**Index** shows the average returns on the underlying market in which the fund invests.

**Sharpe ratio/Sharpe ratio** in index is a measure of the fund/index's return, taking into consideration the risk of the fund/index. A high return attained at a lower risk is better than an equivalent return attained at a high risk. Calculated, on the one hand, as the ratio between the return, less the risk-free interest (interest on government securities) and, on the other hand, as the total risk of the fund/index. The Sharpe ratio is the most relevant ratio for comparing.

**Spread exposure** is shown for fixed income funds, as of the closing date, and is a measure of credit risk. The spread exposure

shows how much the fund will depreciate, in percent of the value of the fund, if the spread between the value of a fixed income fund and government bonds is doubled. Calculated as capital-weighted credit duration multiplied by the spread of the instrument (differential) compared to the government yield curve.

**Tracking error** measures the standard deviation of the difference in the yields between the fund and its benchmark (the variation in the relative yields). The historical tracking error indicates how much the fund's yield has deviated from benchmark.

**Total risk/Total risk** in index is stated as the standard deviation for variations in the monthly yields of the fund/index. The higher the number, the higher the risk.

**VaR** is a parametric in this case and is calculated in accordance with the covariance method. The covariance matrix is presented by the risk system and is updated on a monthly basis. The confidence level is 95% and the time horizon is one day.

[The prospectus, fund rules and fact sheets for each fund are available in the mutual fund price list at handelsbanken.se/funds.](#)

Handelsbanken Fonder AB is a wholly-owned subsidiary of Svenska Handelsbanken AB (PLC).

**About risk**

Historical yields are not a guarantee of future returns. A fund can both increase and decrease in value and it is not guaranteed that you will recover the entire invested amount. Note that a fund with risk level 5-7, as stated in the fund's fact sheet (KID), can vary greatly in value due to the fund's composition and management methodology. Summary of investors' rights, prospectus, fund rules and KID are available under each fund at [handelsbanken.se/funds](#).
