

Summary for a fund reported as an Article 8

Pursuant to EU regulation 2019/2088 on sustainability-related disclosures in the financial services sector (SFDR). This fund promotes environmental and social characteristics through its investments but does not have sustainable investments as its objective.

Fund: Handelsbanken Infrastruktur och Beredskap

No sustainable investment objective

This fund promotes environmental and social characteristics but does not have sustainable investments as its objective. In promoting environmental and social characteristics, the fund takes into account the environment and climate, as well as human rights, labor rights and equal opportunity. In the promotion of environmental and social characteristics, the fund may also invest in sustainable investments, in accordance with the assessment method applied by the Management Company.

Environmental or social characteristics of the financial product

The fund promotes **environmental characteristics** through:

- Investments in companies whose economic activities are considered to be contributing to an environmental objective under the Sustainable Development Goals in Agenda 2030 and/or activities aligned with the EU Taxonomy.
- Exclusion criteria for companies with activities linked to fossil fuels and companies with verified violations of international norms and conventions related to environmental issues.
- The consideration of principal adverse impacts for sustainable development linked to the environment and climate (refer to the explanation above).

The fund promotes **social characteristics** through:

- Investments in companies whose economic activities are considered to be contributing to a social objective under the Sustainable Development Goals in Agenda 2030.
- Exclusion criteria for companies with activities linked to controversial weapons, nuclear weapons, tobacco, cannabis, pornography and commercial gambling, as well as by excluding companies with verified violations of international norms and conventions related to human rights, labor rights or anti-corruption and anti-bribery.
- The consideration of passive adverse impact (PAI) indicators linked to human rights, labor rights or anti-corruption and anti-bribery.

Investment strategy

The fund applies the following investment strategy to fulfil the environmental and social characteristics promoted by the fund:

Dialogue and Asset Stewardship: Active engagement is an essential strategy to influence companies in a more sustainable direction. The Management Company and the fund manager manage this through company dialogues, corporate governance work and work within investor networks. Company dialogues are conducted directly between the fund manager and the company, together with other investors or within the scope of investor networks and other collaborations.

Exclusion strategy: The fund and its index apply sustainability criteria in the form of an exclusion strategy. The strategy includes companies with production and distribution of controversial weapons, nuclear weapons, weapons and military equipment where the company or issuer is domiciled outside the EU or NATO, tobacco, cannabis, pornography, commercial gambling, fossil fuels, as well as companies with verified violations of international norms and conventions related to human rights, the environment, labor rights or anti-corruption and anti-bribery.

Proportion of investments

The fund is managed according to a rules-based, systematic asset management model and normally only invests directly in equities. However, indirect investments in the form of index-based financial instruments (such as futures) may occur for the purpose of managing liquidity.

The minimum proportion of the fund's investments used to attain the environmental or social characteristics promoted by the fund shall total 90.00%. The minimum proportion of sustainable investments shall total 30.00% of the fund's investments.

Monitoring of environmental or social characteristics

The Management Company's risk control function monitors the environmental/social characteristics promoted by the fund on a daily basis to ensure compliance.

The following sustainability indicators are used to assess the environmental/social characteristics of the fund:

- *Sustainable investments:* Share of the fund's value that is invested in companies considered to be contributing to an environmental or social objective pursuant to the Sustainable Development Goals in Agenda 2030 and/or the EU Taxonomy, at the same time as they do not significantly harm any other environmental or social objective and that the companies follow good governance practices. Follow up is conducted by the Management Company's risk control function.
- *Carbon footprint:* Carbon footprint measured in the investee companies' greenhouse gas emissions Scope 1, 2 and 3 relative to the investee companies' enterprise value including cash (EVIC). Follow up is conducted by the Management Company's sustainability group.
- *Greenhouse gas intensity:* The greenhouse gas intensity measured in the investee companies' greenhouse gas emissions Scope 1, 2 and 3 relative to the investee companies' revenues. Follow up is conducted by the Management Company's sustainability group.

- *UN Global Compact (UNGC) principles and Organization for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises*: Share of investments in investee companies that have been involved in violations of the UNGC principles or OECD Guidelines for Multinational Enterprises. Follow up is daily conducted by the Management Company's risk control function.
- *Fossil fuels*: The Management Company's risk control function conducts a daily compliance check to ensure that companies invested in do not exceed the thresholds set for investment in fossil fuels. The proportion of investments in companies that are active within the fossil fuel sector is reported in the fund's annual report. Follow up is conducted by the Management Company's risk control function.

Methodologies

The Management Company regularly applies follow up at the holdings level to ensure that companies with activities in the sectors excluded by the fund and/or companies that violate international norms and conventions are not included in the fund. All of the fund's exclusion criteria are also integrated into the fund's benchmark index.

Data sources and processing

Information on the companies' exposure to excluded activities and incidents that lead to violations of international norms and conventions is obtained from external data providers. The external data providers gather information about the companies' exposure to excluded activities from public presentations made by the companies and/or through direct contact with the companies. Information about violations of international norms and conventions are obtained from ISS ESG. The Management Company's risk control function receives the data and carries out the ongoing control of the fund.

The Management Company conducts ongoing discussions with the external data providers to ensure high-quality data. Specific analyses are completed when there is contradictory information. In questionable situations, the company concerned is contacted to have the opportunity to provide their view on the situation.

Limitations to methodologies and data

Information about the companies' exposure to excluded activities is limited to the information made available from companies themselves. Consequently, it is not always possible to ensure the exact exposure to these activities. The limitations are most prominent for companies with a smaller portion of the business involved in the excluded activities, such as a grocery store that also sells tobacco.

Due diligence

The fund's systematic asset management model is based on the fund's benchmark index, which reflects the fund's core investment universe. The integration of sustainability risk is incorporated into the index methodology and thereby ensures due diligence largely in conjunction with the selection of the index and index provider. Within these tasks, the Management Company ensures that the sustainability criteria established for the product falls within the scope of the index methodology. The party that supplies the sustainability data to the index provider as well as the quality of this data is also assessed. For more information, see "Due diligence routines" at handelsbankenfond.se.

Engagement policies

As a significant investor, the Management Company has a responsibility and an opportunity to engage with companies to act responsibly and conduct their business activities in a sustainable manner, in addition to promoting the development of the sustainability efforts in the asset management industry. The Management Company engages through company dialogues, corporate governance work and investor networks. Our engagement efforts are based on Handelsbanken's core values, our commitments, as well as the international norms and conventions supported by the Management Company.

Designated reference benchmark

The fund is rules-based, systematic managed and the index is not used to determine whether the fund meets the environmental and social characteristics promoted by the fund.
